

# Machined Metal

## Machined metal parts for your needs

Low cost, dependable delivery, multiple applications

We offer CNC turning, milling, drilling, tapping, boring, and grinding. It's just another reason why GBSA is better prepared to deliver custom, quality items for your unique application.

### Materials:

- Aluminum
- Carbon Steel
- Brass
- Stainless Steel

### Custom coatings:

- Full anodizing
- Carbon blacking
- Powder coating
- Hard coating (aluminum)
- Electro galvanizing (for steels and ferric).

Our integrated engineering service includes complete product testing and evaluation, reverse or design engineering. And, at GBSA, deliveries are among the fastest in the industry and tooling costs are surprisingly low. GBSA provides you with a multitude of Value-Added Services. Just-In-Time stocking programs make ordering and tracking inventory shipments easy and at a reduced cost. Kitting leads to a faster receipt of goods and a complete reduction in down time. And, custom packaging is always available when required.
